

## Eagle GIS Viewer

Tyler's GIS Viewer can be integrated with your County's GIS application to provide GIS functionality with Eagle Recorder, Eagle Clerk, Eagle Appraiser, Eagle Assessor, Eagle Treasurer, and Tyler Content Manager.

### Feature Rich user Interface

These features are common to the GIS Viewer across all products:

- Zoom in, Zoom out, Pan
- Mini Map for easy navigation around the County
- Map scale can be turned on or off
- Spatial searching from any point on the map (such as selecting a point on the map and find all the features that are a distance of X away)
- Add and/or remove view layers
- Add labels containing the GIS feature information
- Create custom labels on the map
- View GIS information about a given feature
- Select parcel to display account (Eagle Appraiser)

Within Eagle Assessor, there are several places where GIS is used in the application—dashboard view, Global GIS-specific perspective, search results preview, and parcel workspace.

### Global GIS-specific Functions

Print the GIS View with all highlighting and labels

### Search Results Preview

Highlights all currently selected accounts in result set

### Parcel Workspace

- Add and remove selected parcels from and to the workspace
- Selection based on attribute in the models
- Mass update account information based on GIS information
- Perform attribute search and spatial attribute search (such as finding every house with three stories that is within 300' of Road X)
- Thematic mapping of sale and value data

### Assessor/Appraiser Specific Functions

- A fully functional interactive GIS view from account view select features
- View basic account information by selecting a parcel
- Account search over visible parcels by highlighting/selecting results

**Tyler's GIS Viewer is available with Eagle Recorder, Eagle Clerk, Eagle Appraiser, Eagle Assessor, Eagle Treasurer and Tyler Content Manager.**
