Tyler Content Manager, Standard Edition (SE) For Eden

Tyler Content Manager Standard Edition (SE)* for Eden is an easy-to-deploy content management solution, that is designed specifically for Eden clients of every size. Through easy capture, storage, and retrieval of documents, it's the perfect solution for clients who want to electronically manage and incorporate paper documents seamlessly into their Eden processes.

How TCM SE works

TCM SE is pre-configured and fully integrated with a number of documents. Using Tyler Output Processor (TOP) automates the capture of forms that are normally printed. Clients scan additional documents related to the Eden business processes that originate externally. Users have easy access to all these securely archived documents, retrieving images directly from their Eden inquiry screens or directly from TCM SE. Additionally, system-generated reports can be archived for later retrieval. TCM SE is ideal for clients who wish to eliminate paper, protect images and retrieve a variety of related documents.

Benefits of TCM SE

- Manages electronic documents and lessens the need for storage space and file cabinets
- Stores and archives forms and system-generated reports for short and long-term use
- Provides user access to related documents associated with Eden transactions
- Conforms to Records Management requirements, including retention schedules and file plans
- Responds to records audit information requests, subpoenas, and other mandatory requirements
- Eliminates liability that comes with employees deleting (or not deleting) documents according to best practices
- Eliminates the search for stored papers, saving time and money while increasing productivity

Tyler Content Manager, Standard Edition (SE) For Eden

Control Your Paperwork Process

Eden users see the value of TCM SE each time they view their mission-critical transactional documents. With TCM SE, all documents are linked together through one solution. For instance, users can view a vendor invoice and its related credit memo, quotation, contract document, packing list, or any other incoming correspondence. Human Resource users can view documents related to Personnel Action, New Hire, and Employee files. This feature is leveraged across the organization in multiple business scenarios. Because some Eden content is central to the needs of all users, authorized personnel can display all the associated documents with just a few clicks of the mouse.

**TCM SE is restricted to content management related only to Eden applications. Tyler provides a site license for viewing content for Eden users. For use with applications outside of Eden, clients should consider the TCM Enterprise Edition.*
