

incode
a tyler financial solution

Tyler Content Manager, Limited Edition For Incode

Tyler Content Manager, Limited Edition for INCODE (TCM LE) is a productivity tool that organizes and manages the flow of digital information within your organization. This software brings order to the capture, distribution and archiving of records and other business information. Documents saved as Adobe® Portable Document Format (PDF) files eliminate the time consuming and costly administration of printing and storing hard copy files. TCM LE supports multiple document attachments, such as spreadsheets, word processing documents and scanned images. Stored electronic content includes: faxes, TIFF images, PDFs, electronic forms, photos and e-mails.

Transaction Efficiency

Improve the way your organization handles documents using TCM LE.

- Retrieve information from multiple sources using drag-and-drop to associate electronic information to a folder
- Keep confidential information secure with the extensive security
- Search by date, time, report name and report type

Information and Reports

- Attach documents effortlessly
- Supports indexing and drag-and-drop files
- Drill down from transaction history or reports
- Click on a record to display attachments
- Open and navigate multiple transactions
- Add notes to documents
- Automatically archives/indexes reports, making them instantly searchable and viewable

Benefits

- Individual Display Preferences allow you to easily change the size and color scheme for a user's profile without affecting other system users
- Supports multiple electronic formats, including: scanned images, word processing documents and spreadsheets

Document Management Options

For added features, upgrade to Tyler Content Manager, Enterprise Edition (TCM).

Features of TCM include:

- Browser-based interface that allows public search retrieval, and forms submission via the Internet
- Extensive, robust auditing and version control capabilities to ensure accuracy and integrity of stored documents and content
- Optical Character Recognition (OCR) with full-text search capabilities
- Integrates with Tyler Output Processor

Tyler Content Manager, Limited Edition for INCODE enables you to easily archive and search documents within the INCODE system. It archives purchase orders, change orders, accounts payable checks, accounts receivable invoices, licenses, and permits—eliminating manual data entry. Now that's efficiency!
