

## Testing And Assessment

Imagine your school district having the solution it needs—powerfully driven and easily integrated—to access, compare, evaluate, and ultimately improve student achievement scores. All in accordance with the No Child Left Behind initiative. All at your fingertips.

Testing and Assessment accurately tracks student progress, identifies performance issues, and measures overall achievement. Built for curriculum directors, principals, counselors and teachers to assist in managing and reviewing students' progress, this dynamic solution provides an easy way to track and accumulate data, analyze it, and compare the results to determine gaps and trends—and then implement appropriate interventions.

### Feature Benefits

Whether you prefer to create user-defined reports, or use the powerful report selection provided within the application, criteria-driven results are displayed in an easy-to-understand format. Testing and Assessment allows districts and schools to easily import third-party standardized testing data, and create graphical analyses of each student's performance.

### Portals

View information from My Student Data portal. Data is presented within a browser-based interface, and is accessible district wide at any given point in time. Interactive and on-demand, Testing and Assessment will display results based on your criteria—and allows you to structure and present it in a variety of formats.

### My Student Data

- Access individual, class, subject, grade level, school wide, and district demographic and assessment data for use in planning classroom instruction
- Choose from predefined reports, or create your own assessment reports
- Load and categorize multiple types of assessments such as screening, diagnostic, progress monitoring, and outcome measures
